

Everything Market My Business AI does — in 90 seconds.

Nine tools that replace a \$30k/yr marketing agency. Real screenshots, no fluff.

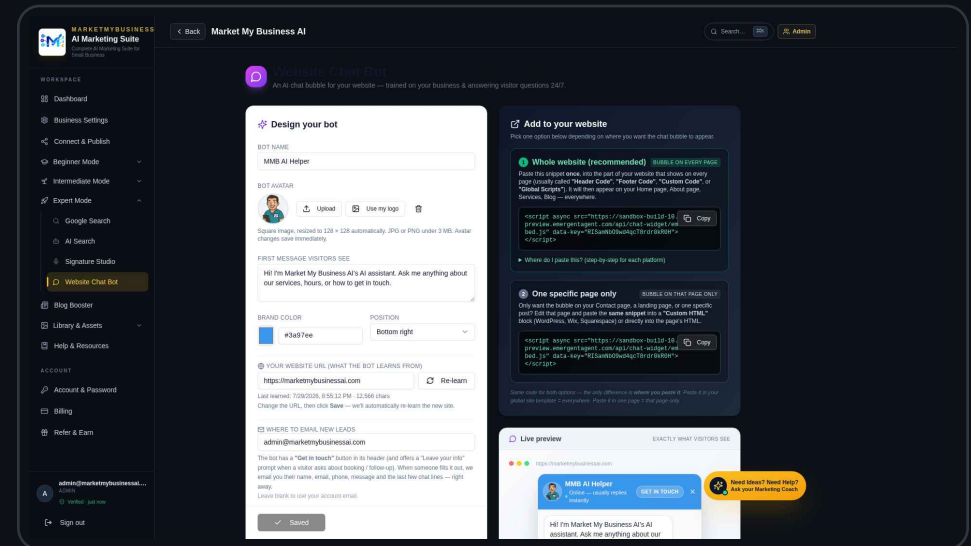

FEATURE 1 • HIGHEST ROI

AI Web-Chat Widget

Captures leads 24/7 while you're closed.

A branded chat bubble trained on your website, hours, and services. Answers visitor questions instantly, emails you every captured lead, and works on any website with a single line of code.

- Trained on your site — knows your services, hours, prices
- Emails every lead the moment it's captured
- Embed anywhere: WordPress, Wix, Squarespace, custom HTML

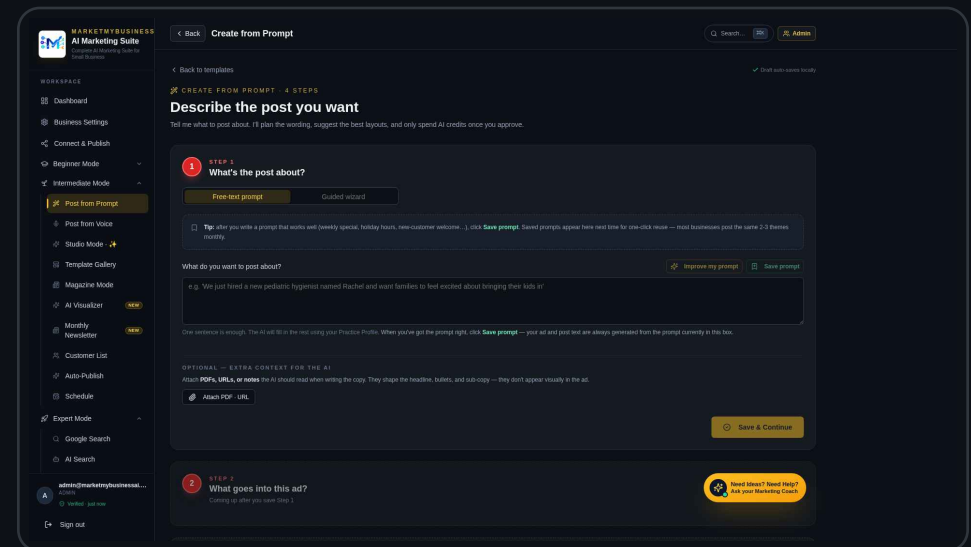

FEATURE 2

AI Post Composer

Daily social posts on autopilot.

Describe what you want to post about — one sentence is enough. Our AI plans the wording, suggests professional layouts, and only spends credits once you approve. Publishes to Facebook, Instagram, and LinkedIn in one click.

- Guided prompts + saved prompt templates
- PDFs and URLs as extra context (menus, spec sheets, blog posts)
- Trained on YOUR business type, tone, and keywords

FEATURE 3

Studio Posters

Magazine-quality ads without a designer.

Fill in the topic, headline, and CTA. Studio Mode bakes the entire ad — text, hero photo, brand colors, logo — into a single publish-ready image. Swap photos or re-render as many times as you like.

- Face-aware cropping so heads never get cut off
- Portrait 4:5, Square 1:1, or Landscape 16:9
- Pre-flight image checks before you spend credits

The screenshot shows the 'Studio Mode' interface for creating AI marketing posters. The interface is dark-themed and includes a sidebar with navigation options like 'Dashboard', 'Business Settings', 'Connect & Publish', 'Beginner Mode', 'Intermediate Mode', 'Post from Prompt', 'Post from Voice', 'Template Gallery', 'Magazine Mode', 'AI Visualizer', 'Monthly Newsletter', 'Customer List', 'Auto-Publish', 'Schedule', 'Expert Mode', 'Google Search', 'AI Search', and 'Sign out'. The main content area is titled 'Studio Mode - NEW' and 'One-shot AI marketing posts'. It contains a form with fields for 'Topic / Keyword', 'Headline (the big text)', 'Supporting copy (under the headline)', 'Benefits bullets', 'CTA text', and 'Describe the person in the photo'. There is also a section for 'Use your own photo instead' with an 'Upload photo' button. The bottom of the form shows 'Aspect ratio' options: 'Square 1:1 (IG / FB feed)', 'Portrait 4:5 (highest quality)', and 'Landscape 16:9 (LinkedIn / video)'. A 'Clear form' button is in the top right. A 'Need ideas? Need help? Ask your Marketing Coach!' button is in the bottom right.

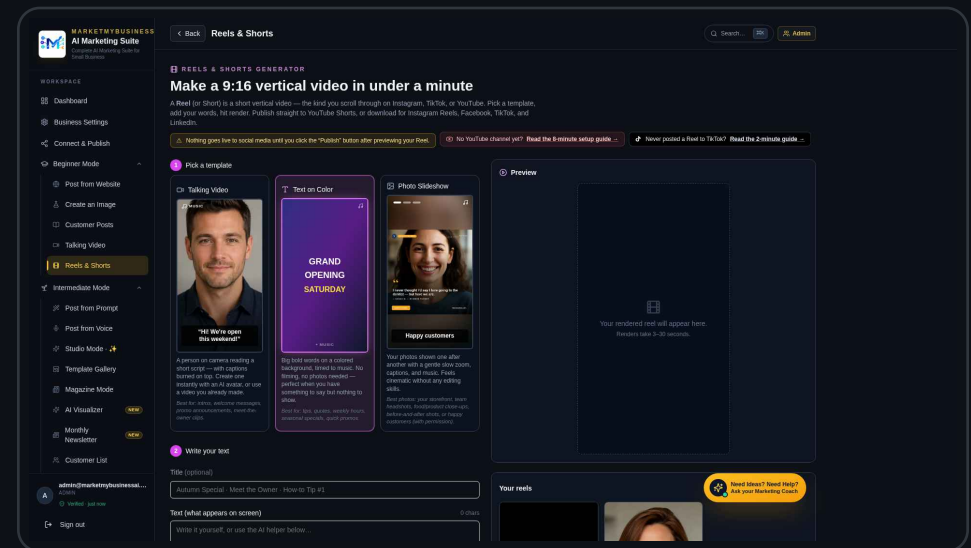

FEATURE 4

Reels & YouTube Shorts

9:16 vertical videos in under a minute.

Pick a template — talking-head, text-on-color, or a photo slideshow. Write your words, hit render. Publishes straight to YouTube Shorts or downloads for Reels, TikTok, and Facebook.

- AI avatar reads your script (no filming required)
- Auto-captions timed to music
- One-click publish to YouTube Shorts

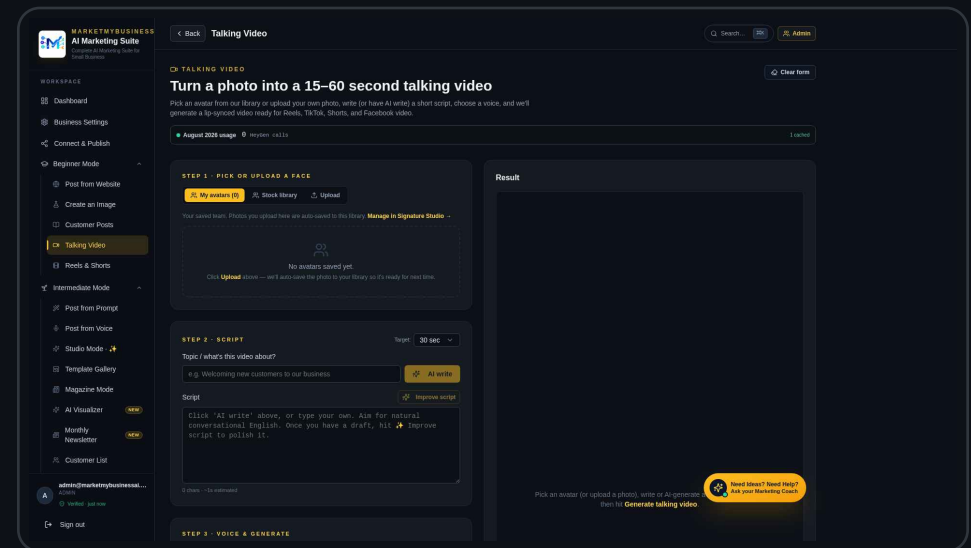

FEATURE 5

Talking Video Avatars

12 personalized videos a year.

Every month our AI writes a script tailored to YOUR business — new-customer welcome, seasonal promo, holiday greeting — then renders it as a talking-head video and publishes to your channels automatically.

- AI-scripted around your business's monthly moments
- Auto-published to YouTube + downloadable for Instagram
- Review window before anything goes live

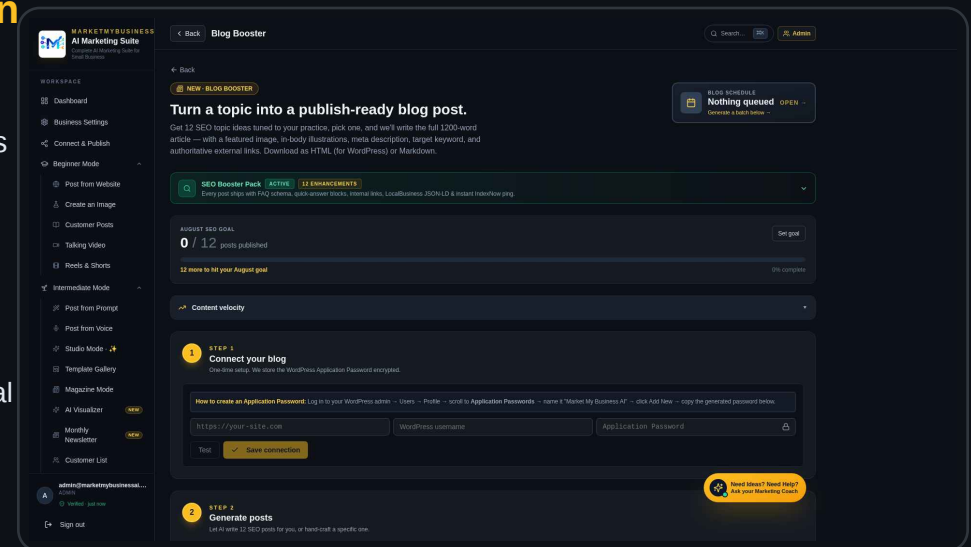

Blog Booster + WordPress Auto-Publish

Three real SEO articles a week, live on your own site.

Press one button and we suggest 12 topics from what your customers actually search. Pick any of them and we write the full 1,200-word article — keyword in the headline, meta description, FAQ schema, quick-answer box, authoritative links — then publish it straight to WordPress on the schedule you set.

- SEO Booster Pack on every post: FAQ schema, quick answer, internal links, IndexNow ping
- Set a monthly goal and let auto-refill keep the queue full — hands-off, forever
- Publish live or save as a draft to review first. Your call, every time.

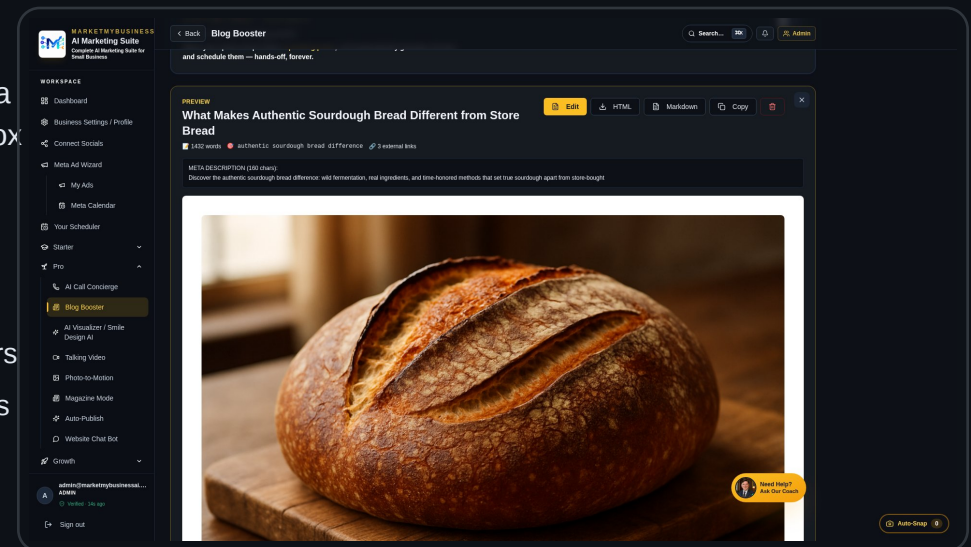

This is what actually lands

A real article the AI wrote — start to finish, no editing.

Not a thin AI blurb. A 1,432-word piece with its own generated photograph, the target keyword placed properly, a 160-character meta description, three links out to authoritative sources, a quick-answer box for AI search and a table of contents. Read it, tweak it, or send it straight to your website.

- Word count, target keyword and external links shown up front
- Download as HTML for WordPress, or Markdown — the article is yours
- Original AI images included: one featured plus two in-body illustrations

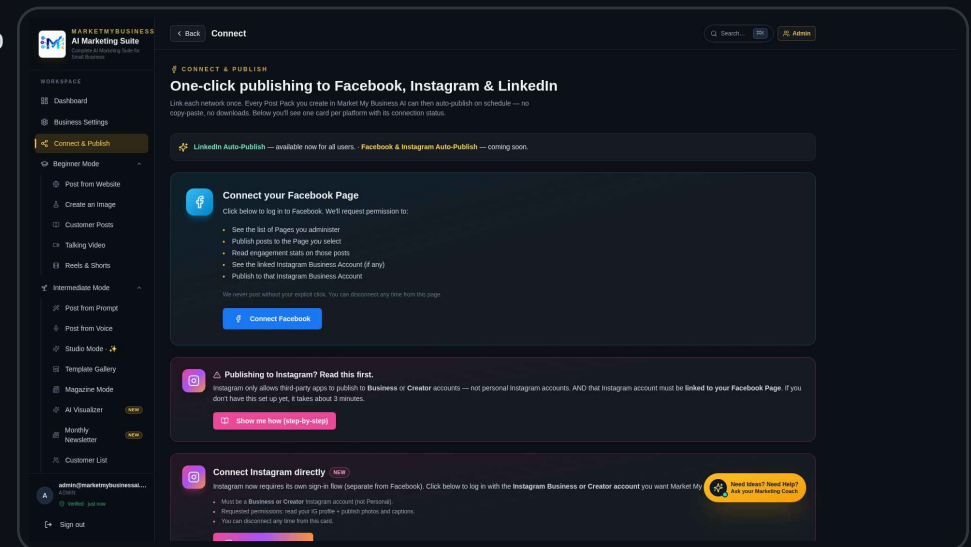

FEATURE 8

Multi-Platform Publishing

One click, everywhere at once.

Connect Facebook, Instagram, LinkedIn, YouTube, and WordPress once — then publish every asset the AI creates with a single click. No copy-pasting, no reformatting, no juggling logins.

- Facebook, Instagram, LinkedIn, YouTube, WordPress
- Auto-formatted for each platform's dimensions
- Schedule posts up to 12 weeks in advance

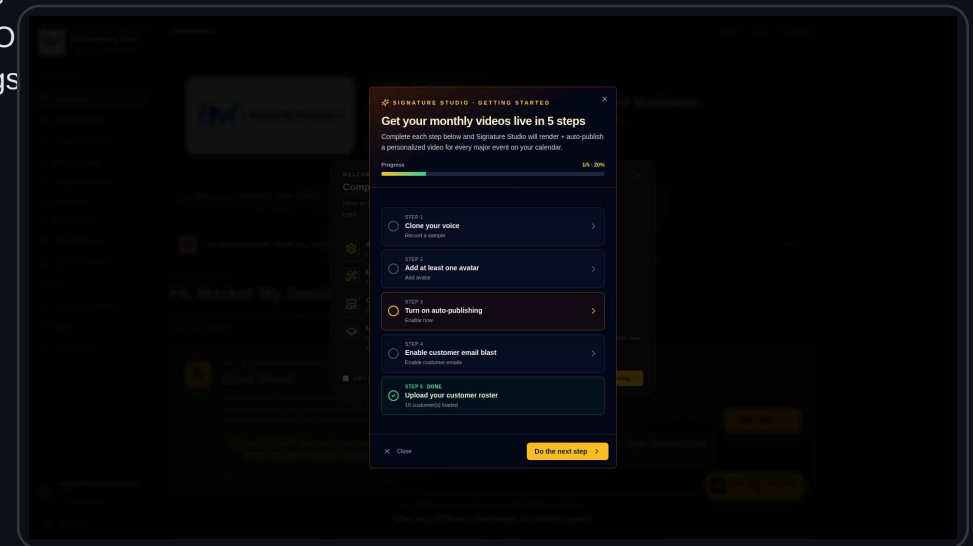

FEATURE 9

Command Center Dashboard

Every metric that matters, in one place.

Track what's scheduled, what's published, and what's converting. The dashboard rolls up posts, leads captured by the chat widget, blog SEO progress, and monthly video renders so you always know where things stand.

- Weekly and monthly output at a glance
- Chat widget leads captured (with the actual conversations)
- Publishing queue across every platform
